Calculations according your application datas

Heating Power of the temperature Controller

Mould weight: (KG)

Mould Material:

Thermal Fluid:

Mould Temperature during process: (°C)

Mould Temperature at start-up: (°C)

Mould warm-up time: (Hours)

Electrical Supply:

Cooling power of the Temperature Controller

Qty of transformed material: (KG/Hours)

Type of Material:

Material process temperature: (°C)

Cooling water temperature: (°C)

Option needed:

Manifolds Inlet/Outlet (Nb.)

Alarm Output (potential free contact)

Others:
